A taxonomic analysis of species of the *Scutellaria* L. series *Supinae* Juz. is performed. New data on the species taxonomy within this group and their distribution in the Eastern Europe (former USSR), the Urals, Altai, Eastern Kazakhstan are provided. An identification key to the species of *Scutellaria supina* group is given. The Linnaean *S. supina* L. s.str. is identified with the Ural members of this group. The types of several names are designated. New species *Scutellaria oreades* Knjaz. and *S. stepposa* Knjaz. are described.

**Keywords:** *Scutellaria*, section *Lupulinaria*, typification, new species, Ukraine, Russia, Kazakhstan

ACKNOWLEDGEMENTS

The investigation was carried out within the framework of the research project AAAA-A17-117072810011-1.
