The article deals with the finding of *Melica altissima* L. in the Crimea. The species was listed for the region by J. G. Georgi as far back as 1800, but since then have been considered as missing in the Crimea.

Keywords: *Melica altissima*, floristic finding, Crimea

DOI: 10.31857/S0006813621090052

ACKNOWLEDGMENTS

The author expresses his gratitude to Al.V. Yena and Ya.A. Yena for organising field research.
