Data on 14 vascular plant species new to the flora of the Ivanovo Region are presented. Among them, 2 species are native (*Galium octonarium* (Klokov) Soo, *Hypochaeris radicata* L.), and 12 species are alien (*Agastache rugosa* (Fisch. et C.A. Mey.) Kuntze, *Anthriscus cerefolium* (L.) Hoffm., *Briza maxima* L., *Chionodoxa luciliae* Boiss., *Cornus sanguinea* L., *Crataegus vulgicus* Pojark., *Cymbalaria muralis* Gaertn., B. Mey. et Schreb., *Iberis umbellata* L., *Lepidium virginicum* L., *Lonicera caerulea* L., *Ornithogalum umbellatum* L., *Ribes alpinum* L.). New localities of 13 species rare in the region are reported briefly.

Keywords: vascular plants, new species for the regional flora, alien species, Ivanovo Region
