Four species of the genus *Rosa* L. new to the flora of Dagestan were discovered during field research. *R. kazarjanii* Sosn. was recorded for the first time in the flora of Russia. New localities of *R. glabrifolia* C.A. Mey. ex Rupr. are reported.

Keywords: floristic records, Dagestan, *Rosa*

ACKNOWLEDGEMENTS

The work was carried out within the framework of the project “Structural and functional features of plant communities with the participation of populations of rare and resource tree species (on the example of the Eastern Caucasus)” (no. NIOKTR AAAA-A19-119020890099-4).
