

FLORISTIC RECORDS

RECORD OF *SCHOENOPLECTUS TRIQUETER* (CYPERACEAE)
IN THE UPPER VOLGA REGION

E. A. Belyakov^{a,#} and V. S. Vishnyakov^{a,##}

Schoenoplectus triqueter (Cyperaceae) was first discovered in the Yaroslavl Region. The new record of the species is its northernmost locality, namely near the town Tutayev on the Volga River, the Gorkovskoye Reservoir, where the species has naturalized.

Keywords: *Schoenoplectus triqueter*, alien species, distribution, Yaroslavl Region, Gorky reservoir

ACKNOWLEDGEMENTS

The study was carried out within the framework of the institutional research project of the Papanin Institute for Biology of Inland Waters of the Russian Academy of Sciences (№ 121051100099-5).
