New data of localities of *Coleanthus subtilis* (Tratt.) Seidel ex Roem. et Schult. in the Western Siberia are presented. This is a rare species listed in the Red Data Book of the Russian Federation. The species is recorded in the Tyumen Region, in the Tobol River floodplain. When describing the floodplain plant community, a rare species *Physcomitrium pyriforme* (Hedw.) Hampe was found for the first time in the Tyumen Region. The provided information is significant for the Red Data Book of the Russian Federation.

Keywords: *Coleanthus subtilis*, *Physcomitrium pyriforme*, floristic records, Tyumen Region, Red Data Book

ACKNOWLEDGEMENTS

The authors are grateful for information and herbarium materials provided by I.I. Gureyeva (Krylov Herbarium of Tomsk State University), A.B. Kharitontsev (Tobolsk Historical and Cultural Museum and Nature Reserve), B.S. Kharitontsev (Tobolsk Complex Research Station, Ural Branch RAS) and A.P. Dyachenko (Urals State Pedagogical University) for identification of bryophyte.
