The article describes the findings of *Corydalis cava* (L.) Schweigg. et Körte in the Central Forest State Natural Biosphere Reserve and in its conservation zone. This species is new for the flora of the Tver Region. Duplicate herbarium specimens were transferred to the Komarov Botanical Institute RAS (LE).

Keywords: Corydalis cava, new species, Central Forest State Natural Biosphere Reserve, Tver Region

ACKNOWLEDGEMENTS

The work was carried out according to the state project of the Komarov Botanical Institute of the Russian Academy of sciences No. AAAA-A19-119031290052-1 “Vascular plants of Eurasia: taxonomy, flora, plant resources” and the state project of the Central Forest State Nature Biosphere Reserve No. 1-22-87-1 “Dynamics of patterns and processes in the southern taiga complex of the Central Forest State Natural Biosphere Reserve”.
