The paper presents data on the types of the names of 53 taxa of Liliaceae s.l. (Alliaceae, Amaryllidaceae, Asparagaceae, Asphodelaceae, Convallariaceae, Hyacinthaceae, Liliaceae s.str.) kept in the Herbarium of Tsitsin Main Botanical Garden RAS (MHA). A Latin name with nomenclatural citation, category of the type specimen (s), quotations of their labels and protologues and some notes are given for each taxon. The lectotypes of *Gagea graminifolia* Vved., *G. popovii* Vved., *G. praemixta* Vved., *Tulipa caucasica* Lipsky, *Allium elegans* Drobow, *Henningia altissima* A.P. Khokhr., and lectotypes and epitypes of *Tulipa androssowii* Litv. and *Eremurus hilariae* Popov et Vved. are designated.

Keywords: Herbarium of Tsitsin Main Botanical Garden of the Russian Academy of Sciences, lectotypification, MHA, nomenclature, type specimen

ACKNOWLEDGEMENTS

We sincerely thank V.V. Byalt, I.V. Tatanov, L.M. Raenko, M.V. Legchenko, I.G. Levichev and V.V. Shvanova (Komarov Botanical Institute of the Russian Academy of Sciences) for the help in searching necessary herbarium specimens and consultations, and curators of other Herbaria: MW, NS, NSK, TASH, TBI; I.V. Belyaeva and A.S. Zernov for consultations on botanical nomenclature; A.B. Shipunov and A.P. Kovalchuk for search and digitization the protologues published in foreign sources; and the students of the club “Putnik” in the Educational Center of Children Development “Germes”: E. Zharina, T. Solonar, M. Loktev for primary digitization of the herbarium specimen images and scanning some protologues.

We thank Ministry of Science and Higher Education of Russia for supporting of CCU “Herbarium MBG RAS”, grant 075-15-2021-678.

The work was carried out in accordance with the Institutional research project of Tsitsin Main Botanical Garden RAS № 122042700002-6, and “Taxonomic revision of polymorphic plant families of the flora of Uzbekistan” (FZ-20200929321).
